

### Ideas for using the drinking straws

- Different colour straws to indicate level of difficulty of different tasks
- Win straws by answering question. Team with longest line of straws wins.
- Use to create random groupings for group work.
- Whoever gets the short straw has to answer a question/complete a task
- Allocate each colour to a part of speech (tense/connective/adjective etc.). Students should aim to get rid of their straws the quickest by using a range of language.
